## SOFTWARE ENGINEER

Dependable and performance driven professional with a background in administration, training, and database systems management. Passionate about learning new technologies and am always eager to expand my skill set. Creative problem solver and enjoys collaborating with others. Special focus on process improvements and root cause analysis.

## PROFESSIONAL EXPERIENCE

---

### **Per Scholas – 10/2022 to 01/2023**

#### ***Software Engineering Bootcamp – Dallas, TX***

- I completed a 15-week program where I learned about current web technologies and developed applications using those technologies. Highlights include:
  - Web-Based Game application - A 2 player game developed using HTML, CSS, and JavaScript where I used DOM manipulation to simulate the classic game of Connect Four.
  - E-Commerce application – A restaurant website where users can create, read, update, and delete menu items. Developed using Express, Node, MongoDB, RESTful API.
  - Fitness Tracker application – A full stack web application to record progression of body measurements. Developed using React, Express, Node, MongoDB, Bootstrap.

### **CAE Simuflite – 4/2022 to 10/2022**

#### ***Records Administrator – Grapevine, TX***

- Maintain accurate and up-to-date records of all clients, including personal information, flight training records, and FAA-required documents.
- Collaborate with other departments, such as flight training and operations, to ensure compliance throughout all aspects of the business.

### **State of California – 10/2019 to 03/2022**

#### ***Department of Transportation – Training Coordinator – Oakland, CA***

- Coordinate and schedule training programs for district employees, including instructions for in-person and remote trainings.
- Manage and maintain accurate training records, including attendance, course evaluations, and certification records.

### **Tesla – 10/2015 to 10/2019**

#### ***Foreign Trade Zone Inventory Associate – Fremont, CA***

- Collect and analyze inventory data for manufacturing and repairing automobiles.
- Develop and implement process improvements to existing operational procedures in order to maximize accuracy and efficiency.
- Produce and present inventory reports including charts, tables and graphs to management.
